Concepts : Object Oriented Programming, Functional Programming, Agile, MVC , Rest Api

PROJECTS

Anaflix App / Web -

1. **App:** Android, IOS, Ionic, Angular, Typescript, Scss
 2. **Web:** Html , CSS, Javascript, PHP,
- Develop this app for ANAROCK Property Consultants for employee management and training. Employees can conveniently access the new Anaflix policy and earn coins with just one view.
 - The HR policy can be easily accessed in the sidebar, which is organized dynamically with a tree-folder structure.
 - Improving the onboarding experience for over 5000 employees and providing training on ethics and professionalism through this app.

JoinDevops

1. **Web:** Html , CSS, Javascript, PHP, React.js,Sql,Redux
- Create a web application for the Learning Management System (LMS)
 - Include a feature allowing students to refer specific courses to their friends
 - Enable anyone to buy courses using promo codes
 - Implemented a system for students to comment on specific sections of a course video and add their notes.
 - A new feature has been implemented where users can play a video, and the watch time will increase. If the user re-watches the video or tries to fast forward, the watch time will not be counted.

Purplelane

1. **Web:** Html , CSS, Javascript, PHP, React js,Sql
- I have work on the landing page Added payment gateway for add to cart
 - Integrating Razer Pay for payments.

EDUCATION

Bachelor of Computer Applications

Indira Gandhi National University

2021-2024
